

THE TRUSTED CHOICE FOR CONTROL

McCROSSIN's Mechanical Division services have been the choice of many regional Fortune 500 companies and manufacturing clientele for decades. We offer in-house pipe prefabrication, and utilize a strong supplier network to ensure our clients receive competitively priced materials on schedule and within budget.

Operations such as those in the pharmaceutical and food processing industries trust our McCROSSIN Mechanical Division to work under stringent process regulations, as well as to perform quality control/testing, fabrication, total design systems, tie-in work, welding, facility/equipment repair, turn-key installations, and overall management of multi-phased projects. We regularly conduct mechanical service work without interrupting our clients' operations, adapting our work procedures to support our clients' production schedules. McCROSSIN is pleased to accommodate clients' needs in order to minimize any inconvenience in operating facilities, specifically performing shift work during or round-the-clock hours as the project requires.

SAFETY FIRST

McCROSSIN delivers projects on time and within budget while achieving the highest levels of safety, proficiency, and quality control.

We are dedicated to our core principle underlining that each project task must be completed safely to be considered successful in meeting our expectations for project outcome.

At McCROSSIN, we are committed to being 'Safe in Every Direction.'

STRONG IN EVERY DIRECTION

McCrossin's Mechanical Division specializes in getting your operation up and running, and keeping it that way, by routinely completing maintenance and improvements without facility disruption. With extensive fabrication capabilities in-house, we can help our clients maximize their budgets and meet demanding schedules, without sacrificing project quality.

Our Mechanical Division team is expert in process and industrial piping, and has completed projects for:

- Water treatment facilities
- Fracking sites
- Pharmaceutical plants
- Government and educational institutions
- Large-scale Fortune 500 manufacturers

Over the years, we have built a strong reputation across multiple industries, as a premier plumbing contractor, experienced with storm, sanitary and vent, compressed air, domestic water, and acid waste piping. Our services include: stainless steel and carbon, mechanical waste water treatment piping, cooling process piping, and total systems for solids, liquids, and gases. Our HVAC services extend into all piping categories including: steam, chilled water, heating, and hot water.

For any project large or small, McCrossin Mechanical has the right solution. Trust McCrossin to exceed expectations on your next project.
