

YOUR SINGLE SOURCE SOLUTION

For over seven decades, McCrossin has provided comprehensive, full-service contracting and geotechnical solutions through our Constructors, Foundations, Mechanical, and Electrical Divisions, to establish itself as a regional leader.

For the fourth consecutive year, McCrossin has received the distinct honor of being recognized as one of the nation's **Top 600 Specialty Contractors** by ENR Magazine, the leading source for reputable, up-to-date, industry news.

We have assembled a skilled and experienced team to provide our clients with the most competitive solutions on every project, promoting quality, versatility, and integrity within our industry.

Across each of our divisions, we provide continuing education, regular safety training and certifications, and internal collaboration necessary to exceed client expectations. Our divisions can function as one, or as separate entities and/or subcontractors, to take any project from its pre-planning stages to final completion.

AREAS OF EXPERTISE

- CONSTRUCTORS
- FOUNDATIONS
- ELECTRICAL
- MECHANICAL

CONSTRUCTORS

Our expertise covers all phases of construction including site development, structural concrete and steel, design-build, and precast structures. McCrossin provides high quality project management, conscientious of project specifications and schedule guidelines. As a result, we can complete jobs quicker, safer, and within schedule and budget constraints.

FOUNDATIONS

Our Foundations Division provides comprehensive geotechnical and deep foundations services. We have a broad range of capabilities, including anchors and tiebacks, retaining walls, tiedowns, caissons, soldier pile/lagging, driven piling, secant pile walls, foundation grouting, tangent pile walls, marine construction, compaction grouting, micropiles and design-construct services. Client markets include industrial, commercial, institutional, recreational facilities, heavy highway, and power generation/transmission.

ELECTRICAL

Our Electrical Division provides primary power and secondary power services, as well as electrical control systems. We have extensive experience in bringing high voltage primary power to sites, and take care of all related equipment and transformer needs including any distribution or medium voltage system needs.

MECHANICAL

Our Mechanical Division continues to be the choice of Fortune 500 companies and manufacturing companies, to perform in-house pipe prefabrication and ensure competitively priced materials and on-schedule work. Team capabilities include: utility piping, HVAC plumbing and geothermal, industrial/process piping, stainless/carbon piping, steam/chilled water/heating/hot water, waste piping, sewer, gas, and mechanical waste water treatment piping.
