

OVERVIEW

McCrossin works with clients throughout the Mid-Atlantic on single element to large scope projects. We are a full-service, self-performing construction company, consistently ranked as one of the top 600 in the nation.

THE POWER OF LEGACY

McCrossin has been raising the standard for construction throughout Pennsylvania and surrounding Mid-Atlantic states since 1951. From the beginning, we have strived to establish our reputation as a firm delivering quality, versatility and integrity to every project. Our commitment to building strong relationships with our clients has allowed us to remain a successful, family-owned corporation through economic and market fluctuations. Today, we provide a more comprehensive, full-service offering than ever before from our Constructors, Foundations, Mechanical and Electrical Divisions. We have retained a proud history without compromising our progress—while respecting its founders—McCrossin has become a company led by a collective team of dedicated employees in a new era.

OVERVIEW

Full-service capabilities include:

- Construction management
- Prime contracting
- Sub-contracting
- Design-build
- General contracting
- Electrical, mechanical, concrete, deep foundations, specialty geotechnical services, and safety training

We are a company with safety at our core, and a legacy built upon the strength of our services, our products, and our people.

STRONG IN EVERY DIRECTION

A COMMITMENT TO OUR COMPANY, A PROMISE TO OUR PEOPLE

Our clients trust us to deliver excellence on every job site, and our employees trust us with their safety, knowing that we put their well-being above all else.

At the end of each day, we want our men and women returning home healthy. Rules that we implement through our formalized program are there for a reason—our most important asset is our people.

Our team makes an industry-wide effort to avoid injury, and we regularly offer on-site training for various types of hazards that workers may come in contact with on a daily basis. We are vigilant in inviting OSHA and private safety consultants to review our safety program and job sites to provide feedback and improvements to keep every site an injury-free zone. McCrossin is safe in every direction.

A STRONGER STRUCTURE

McCrossin has over 60 years of experience in the construction industry and is one of the most versatile self-performing firms in the Mid-Atlantic region. We offer a full-service from a single-source: we provide service in any, and all phases of construction, start to finish. McCrossin respects our clients' resources as though they were our own, while being conscientious of budgetary and scheduling guidelines.

CAPABILITIES:

Site Development

- Installation of all site utilities, including underground utilities and gas
- Storm water control and management, as well as sewer water control

Design-Build

- All design-build services supplemented utilizing current BIM capabilities
- Design-build for an array of facilities – from water treatment to pump stations

CONSTRUCTORS

Structural Concrete

- Poured concrete foundations and vertical concrete
- Manufacturing or facility-related foundation work

Structural Steel

- Coordination of mechanical systems and constructability for optimum results
- In-house provision of structural steel for a variety of structures, including factories, stadiums, power plants, and equipment elevation

Innovative Contracting Methods

- Collaborative, pre-build contingency plans
- Solutions from one exceptional source

STRONG IN EVERY DIRECTION

CONSTRUCTORS

Our four divisions work together to take projects from pre-planning stages to final completion under stringent guidelines and demanding timeframes. We also work as sub-contractors and geotechnical specialists for clients seeking specific services.

FOUNDATIONS

McCrossin's geotechnical team has extensive experience with deep foundations drilling and ground improvement in difficult soil types throughout the country. We own our own fleet of machinery for both small and large diameter drilling.

EXPERT PRECISION

The McCrossin Foundations division provides some of the most comprehensive geotechnical and deep foundations services in the region. We also offer design capabilities for all foundation structural elements and earth retention systems for a wide spectrum of clients. Utility preparation and installation projects, as well as site development, directly benefit from our foundations capabilities, creating an efficient, cost-effective way to expedite projects requiring McCrossin's full-service expertise.

Due to the growing demand for our deep foundations services, we have two foundations offices in Pennsylvania: one in the Pittsburgh area, and the other in Hershey. This allows us to quickly dispatch fleets and crews to projects in less time and for less cost.

FOUNDATIONS

Our team has extensive experience with geotechnical and deep foundations projects across industrial, commercial, institutional, recreational, heavy highway, and power generation industries.

We provide an unmatched standard of excellence in the following services:

- | | | |
|-------------------------|-------------------------|-----------------------------|
| • Anchors and Tiebacks | • Soldier Piles/Lagging | • Marine Construction |
| • Retaining Walls | • Driven Piling | • Compaction Grouting |
| • Tiedowns | • Secant Pile Walls | • Micropiles |
| • Rock and Soil Nailing | • Foundation Grouting | • Sheet Piles |
| • Caissons | • Tangent Pile Walls | • Design-Construct Services |

STRONG IN EVERY DIRECTION

THE TRUSTED CHOICE FOR CONTROL

McCrossin's Mechanical services have been the choice of Fortune 500 companies and manufacturing clientele for decades. We offer in-house pipe prefabrication, and utilize a strong supplier network to ensure our clients receive competitively priced materials on schedule and within budget.

Typically working under strict operating guidelines, McCrossin is the first choice for large projects needing stringent quality control and testing, fabrication, design systems, tie-in work, welding, repair, turn-key and equipment installations, and management of multi-layered tasks and phases. We adapt our work to allow operating facilities to function while we make improvements. McCrossin schedules shift work or round-the-clock hours to minimize client inconvenience.

McCrossin offers process piping for any operation, including water treatment for fracking sites, pharmaceutical plants, government and educational institutions, and large scale Fortune 500 manufacturers. Some of the piping we provide includes: stainless steel and carbon, mechanical waste water treatment piping, cooling process piping, and all piping systems for solids, liquids, and gases. Our HVAC services address all piping categories, including steam, chilled water, and heating and hot water. We have maintained a reputation as the region's trusted industrial plumbing contractor, and are experienced with storm, sanitary and vent, compressed air, domestic water, and acid waste piping.

2 MECHANICAL

Capabilities:

- Utility piping for steam, sanitary systems, storm water, utilities, emergency, and plants
- HVAC systems, plumbing, and geothermal
- Water systems, including clarifiers, process piping, and chemical treatment systems
- Industrial piping, including chemical sewer, gas, potable water, steel and stainless

STRONG IN EVERY DIRECTION

The choice of many regional Fortune 500 companies, McCrossin's Mechanical division routinely makes improvements to operating facilities without disruption. Our in-house fabrication capabilities allow our clients to maximize their budgets without sacrificing quality.

8

ELECTRICAL

McCrossin offers a wide range of exterior, and interior, power services, including those for main distributions, emergency back-up systems, streetscape, and HVAC control systems. We keep a licensed commercial electrical inspector and master electrician on staff at all times to ensure quality and safety.

PROGRESS THROUGH POWER

McCrossin believes in performing electrical work that withstands the effects of extended use. We keep at least one licensed commercial electrical inspector and master electrician on staff at all times to ensure that standards are universally met. McCrossin provides primary power and secondary power services, as well as electrical control systems. We have extensive experience in bringing high-voltage primary power to sites, and take care of all related equipment and transformer needs. We specialize in the installation of electrical control systems for:

- Telecommunications
- Security Systems
- Industrial Processes
- Sound
- Alarm Systems
- Other Low-Voltage Requirements
- Lighting
- Data

9

ELECTRICAL

Some of our electrical capabilities include the following:

- Interior power, including distribution, emergency back-up systems, UPS, and TVSS
- Exterior power, including distribution and medium voltage systems
- Electrical control systems
- Security systems
- HVAC control systems
- Lighting, including LED, streetscape, theaters, and lighting control systems
- Process Control Systems
